## Technical Data Sheet

# DEGREASER 360

## Cleaning and degreasing of various surfaces

### Overview:

Degreaser 360 is a concentrated cleaning liquid containing a high percentage of surfactants. The product has been developed for the cleaning and degreasing of various surfaces.

### Main Features:

- Alkaline liquid.
- Not flammable and non-toxic.
- Biodegradable

### Advantages:

- Degreaser 360 can be applied manually or via equipment.
- Due to its concentration Degreaser 360 is cost-effective in use.
- Door de huge concentrate is het product economist in gabbroic.
- The use of this chemical does not affect the performance of oil/water separators.

### Application Information:

Degreaser 360 can be diluted up to maximum 1:100 to 1:50 with water. Dilution percentages depend on a number of parameters, including the type and amount of dirt to be removed, the application method and the temperature of the solution.

Degreaser 360 is suitable for all methods of application, from brush to low and high pressure water cleaning equipment.

After any application of Degreaser 360 and the cleaning process completed, the cleaned surface must be well rinsed with plenty of fresh water.

### Physical and Chemical Properties

pH - 12.3  
Relative density/20 degrees C - 1.060 Kg/L  
Flash point, degrees C - /  
Solubility in water - completely soluble

### Precautions:

Always refer to the appropriate MSDS before handling or use. It is recommended that the surfaces to be cleaned or treated should initially be tested with a small amount of the selected chemical in a non-critical area, to determine if any adverse reaction takes place.

### Packaging Sizes:

- 6 litres container
- 10 litres container
- 25 litres drum
- 200 litres plastic drum
