

STICK OUT

Adhesive Remover

Product Description:

Stick Out is a water-based adhesive remover, that uses a biodegradable formula that is an effective alternative to hazardous petroleum and acetone-based solvents. Stick Out is made from pure citrus peel extracts and as such has a very pleasant scent when used. Stick Out removes most glues, adhesives, silicone residue, carpet seam sealer and mastic. It also removes dirt grease, grime, heel marks and floor wax. It is not recommended for varnished surfaces.

Features:

- D'Limonene uses its natural degreasing abilities to break the bonds between the polymers in adhesives.
- Does not exude any toxic fumes as compared to other options such as kerosene or oil distillates.
- Exudes a sweet citrus aroma as compared to alternatives such as petroleum distillates.
- Multiple all-around uses ranging from home purposes all the way to industrial applications.
- Safely removes adhesive material from your surface.
- Stick Out is biodegradable.

Application:

Wet the entire adhesive surface with Stick Out Adhesive Remover. This may be done with a sprayer or by dabbing Stick Out over the surface of the adhesive with a rag or towel. Do not over-apply Stick Out in the first step. Allow Stick Out

to soak and penetrate for a few minutes to soften the adhesive. Scrape the label and the bulk of the softened adhesive from the surface and wipe clean. Depending on the particular job, a second application may be desired for optimal results. Therefore, re-apply Stick Out Adhesive Remover as in step one, wiping up as much of the residue as possible.

Active Ingredient:

Active Ingredient:	CAS Number
Aqua	: (CAS No.) 7732-18-5 S2-
D'Limonene	
(Orange Terpenes)	: (CAS No.) 5989-27-5
Proprietary Surfactants:	(CAS No.) N/A

Physical Properties:

Physical State	: Liquid.
Colour	: Milky White.
Odour	: Characteristic scent.
pH	: 9 @ 20°C
Flashpoint	: N/A

Storage:

Products shall be ideally stored in a cool, dry location in unopened containers at a temperature between 8° to 28°C (46° to 82°F) unless otherwise labelled. Optimal storage is at the lower half of this temperature range. Do not return any material to its original container to prevent contamination of unused products.

Packaging:

Available in 10 litres, 25 litres and 200 litres Packaging.
