# Liquid Crystalline Waterproofing Admixture for Concrete **AQUAFIN®-IC ADMIX**

For any concrete mix requiring waterproofing capabilities.

## Description/Benefits:

- The only liquid crystalline waterproofing admixture – creates a more uniform mix – no fear of clumping!
- Meets NSF/ANSI Standard 61 for Potable Water
- Resists strong hydrostatic pressure
- Self heals hairline cracks up to 1/64"
- Permanent – becomes an integral part of the concrete
- Positive or negative waterproofing
- Negligible interference with water reducers, plasticizers and air entrainment
- Negligible effect on slump
- No odor, non-toxic
- Available in 6 gal. pails or 240 gal. totes
- Compare to these powder admixtures:  
Xypex C500/C1000/C2000 and Kryton KIM HS

## Typical Applications:

Tunnels & subway systems, foundations, precast structures, parking structures, reservoirs, sewage & water treatment plants, swimming pools, underground vaults, etc.

**Think Globally. Act Locally.**
